

Personal Statement

Nitish Nagesh, Ph.D. Student in Computer Science, University of California Irvine

I am excited to attend the doctoral symposium at AAAI 2026 to add value by sharing my diverse experiences in academia, industry and entrepreneurship. I am eager to learn from experts in the field of causal reasoning, synthetic data and health equity.

Slated Contributions to the Doctoral Symposium:

I look forward to sharing my recent research on fairness-aware synthetic data generation that can lead to broader conversations and engagements about health equity, AI safety and aspects of leveraging AI for social good. Going deeper in research, I am excited to share my experience in developing causal models for large-scale time series observational studies for remote patient monitoring. Beyond research, I am keen on sharing experience working as a data scientist intern at health tech companies in the U.S. and my entrepreneurial experience in building a startup (\$10,000 USD funding) geared towards improving mental wellbeing of new mothers through timely dietary interventions.

Leveraging Conference Participation and Presentation Opportunity:

At UC Irvine, I am a mentor for the Artificial Intelligence Club, a Grace Hopper Scholar awardee (i.e. ally for women in tech), and computer science representative for broadening community participation. Being in-person at the conference will help me motivate other students, especially from underrepresented backgrounds to pursue AI research thereby bridging the information gap and increasing diversity in conference participation. I hope to be a better mentor for undergraduates and help them find research opportunities off-campus. I motivated my sister to apply to the undergraduate consortium at AAAI as a freshman in India. During my conference at ACM multimedia, I was awarded the best social media reporter. I aim to bring the same level of enthusiasm to the venue by attending poster sessions, lightning talks and cheering my fellow doctoral students.

Plan of Action:

Before the conference, I plan to reach out to authors/mentors via email initiating the conversation and exploring people I want to interact with. During the conference, I will meet with them for coffee, attend their talks/sessions, take pictures and connect with them on LinkedIn. Post conference, I will make a LinkedIn post sharing my experience, followup with people I met and explore potential avenues for synergy in the future.
